

# growing GUIDE

## STEP 1 CRABGRASS PREVENTER PLUS LAWN FOOD

15-0-4

Apply February through April

Target date: April 1st

Pre-emergent herbicide and low volatility fertilizer

Offers season-long control of 30 annual grasses and broadleaf weeds, including crabgrass, goosegrass, foxtail and barnyard grass.

## STEP 2 GRUB CONTROL & LAWN FOOD

12-0-5

Apply Summer through July

Target date: June 1st

Kills grubs and fertilizes in one application

Controls grubs, billbugs, cutworms, June beetles, Japanese beetles and more.

Feeds, greens and thickens your lawn.

Better compounded nitrogen and our zero-phosphate formula helps prevent runoff pollution, keeping ground water supplies free of chemicals.

# LAWN FERTILIZER STEPS

Fertilizing is an important step to take to maintain a healthy lawn. Fertilizing can be tricky to keep up with, so the experts at Colonial Gardens helped break it down into 4 simple steps.

## STEP 3 FALL LAWN FOOD & FERTILIZER

19-0-4

Apply August through September

A phosphate-free fertilizer that restores nutrients to your soil and feeds your lawn.

Contains iron to green and thicken your lawn after summer heat and drought.

## STEP 4 WINTER FERTILIZER

30-0-0

Apply October through December

Late fall fertilizer designed to help lawns store more nutrients for winter survival.

Formulated to encourage thick, rapid growth and rooting in the spring.

Winterizer can be repeated 30 days later.
